An antibody that binds to a PAL enzyme is useful for measuring the relative amount of PAL levels in a tissue. The polynucleotide sequences encoding PAL are useful in the preparation of plant expression constructs for modifying features of the response of a plant expression constructs for modifying features injury from disease. Disruption or down-regulation of PAL activity can be used to reduce the browning response to wounding in vegetable crops. The present sequence encodes lettuce LSPAL1 enzyme.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Claim 1; Fig 5; 46pp, English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Novel polynucleotide useful in preparing plant expression constructs to modify the response of a plant cell to wounding, damage or other injury from disease causing organisms or from plant pests \,\cdot\,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 2442 BP; 693 A; 553 C; 592 G; 604 T; 0 other;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             (Lactuce sativa) phenylalanine ammonia lyase (LSEAL) enzymes, and the polynucleonide sequences encoding them. An antibody that binds to a PAL enzyme is useful for measuring the relative amount of PAL enzyme is useful for measuring the relative amount of the polynucleotide sequences encoding PAL are useful in the preparation of plant expression constructs for modifying features of the response of a plant cell to wounding, damage or other injury from disease. Disruption or down-regulation of PAL activity
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Novel polynoclectide useful in preparing plant expression constructs to modify the response of a plant cell to wounding, damage or other injury from disease causing organisms or from plant pests.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  can be used to reduce the browning response to wounding in vegetable crops. The present sequence encodes lettuce LsPAL2 enzyme.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence 2380 BP; 663 A, 548 C, 603 G; 566 T; 0 other;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Claim 2; Fig 7; 46pp; English.

The gene may be used to produce PAL recombinantly. Plants contg. the PAL gene can contain a large amt. of phenyl propanoid isoflavonoid. See also AAQ33019.

                       Antisense CAD gene fragment is inserted into the plant under the control of a promoter, using Agrobacter tumefacters (pref LB4404) as a vector. Sequence inhibits lighin biosynthesis in the plant improving digestibility of animal inder, and useful in production
